fastrr Ads | by Shiprocket

One tab for every Meta ads answer

Audit performance, mine insights, build creative, run experiments, track competitors and protect spend, all from one platform.

BUILT FOR META ADS TODAY · GOOGLE COVERAGE IS EARLY

THE PROBLEM

100+ live ads, and no idea which one is leaking spend

To find out, marketers open 20 tabs in Ads Manager and wait on its latency, losing efficiency and, in the end, revenue.

Spend leaks unseen

Nobody can check every ad line by line. Losing ads keep spending while winners go unscaled.

Insight is buried

Meta insights only show up if you go line by line through the data. Most teams never get there.

Too many tools, too slow

Research, creative, launch and reporting live in different places. Each switch costs time.

Creative is a black box

Meta reports ROAS per ad, but not which hooks, stories or angles are driving it.

Competitors are invisible

Seeing what rivals run means scrolling ad libraries by hand, with no view of their strategy.

Making and launching is slow

Building creatives, writing copy and launching each happen in a different place, so testing stays slow.

THE SOLUTION

A marketer's whole day, in one platform

Fastrr Ads stitches five jobs together so nobody has to go back to Ads Manager through the day.

01

Own data

Creative performance, audits and trends across your Meta account.

02

Competition

What rivals run, and which creative strategy they optimise for.

03

Ad spend

Rules and alerts find what drains spend and what has upside.

04

Meta insights

Audience, reach and conversion patterns a line-by-line read would miss.

05

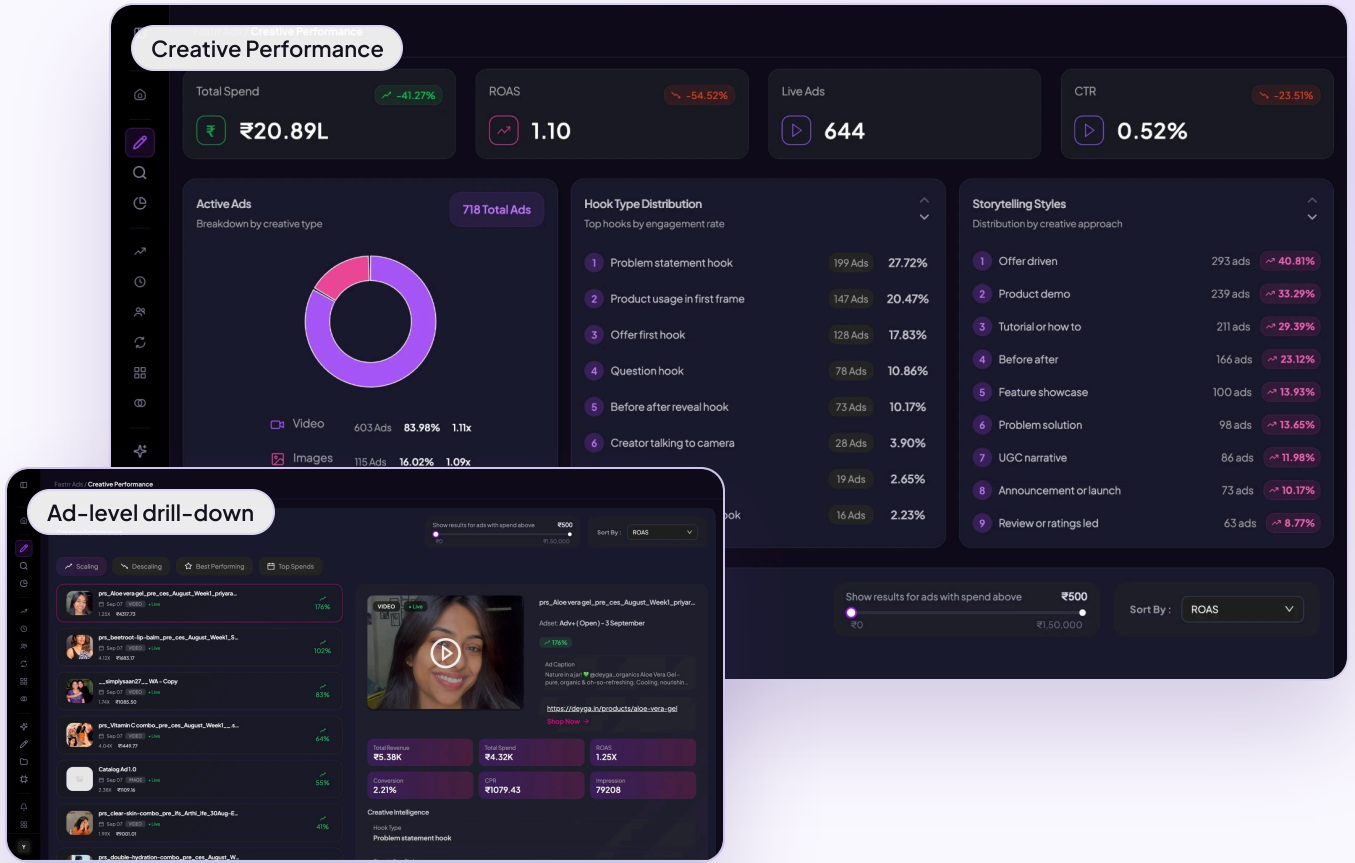

Create & launch

Generate AI creatives and launch them from the same place.

01 · OWN DATA

Your account, at a glance

- **The first screen of the day:** spend, ROAS, live ads and CTR, with changes vs the last window.
- **Winners and losers:** see which creatives are scaling, which are descaling, the top spenders and the best performers. Sort by ROAS or CPR.
- **Custom table:** add any metrics, sort any way. No trips back to Ads Manager.

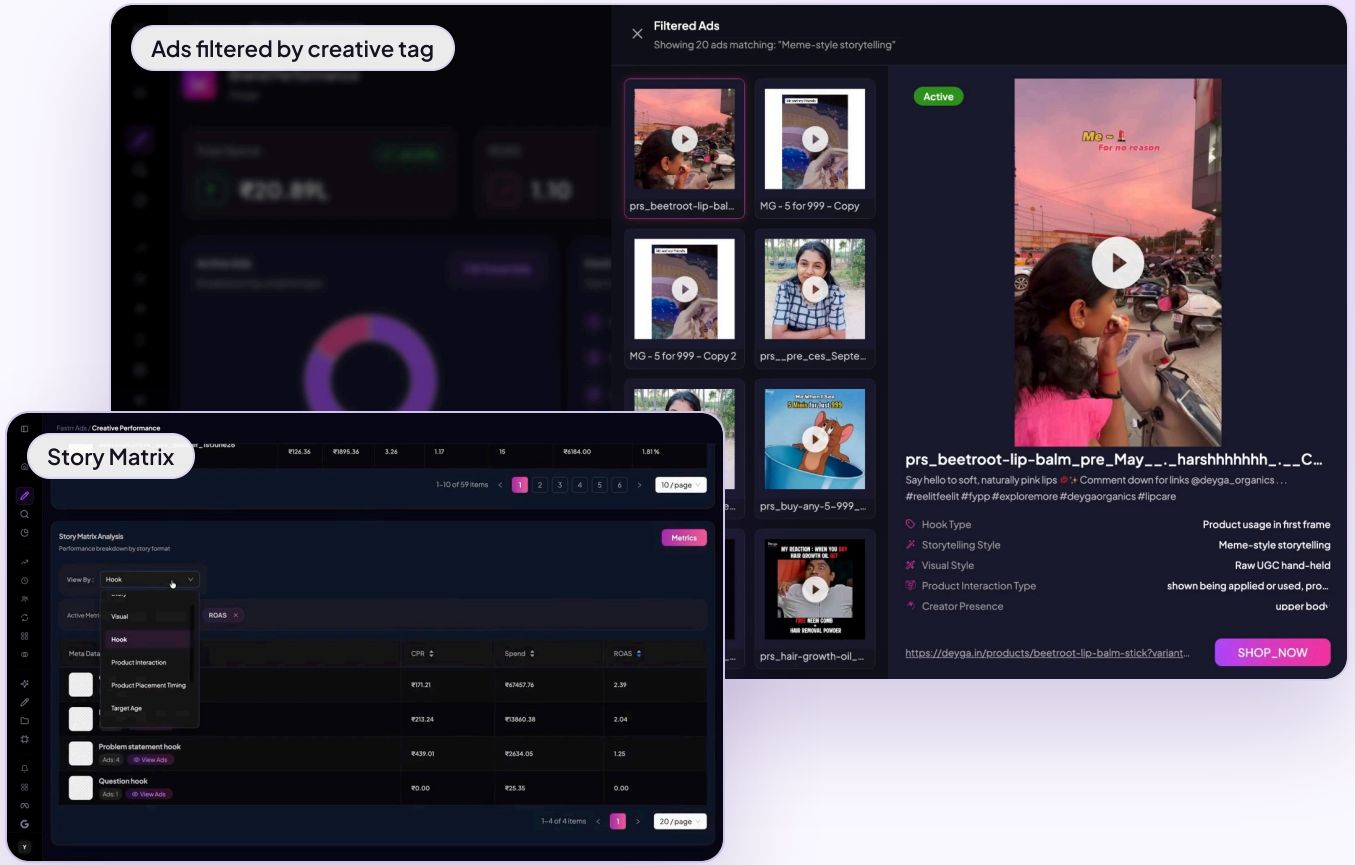

fastrr Ads

02 · CREATIVE INTELLIGENCE

Learn which hooks and angles move ROAS

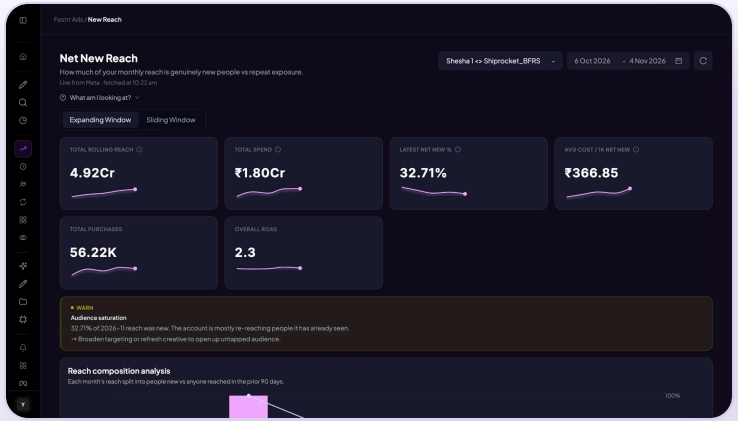

- **Auto-classified creatives:** every ad is tagged by hook, storytelling style, visual style and creator presence.
- **Story Matrix:** split performance by gender, hook or story style to see the strategy your account really runs on.
- **Recommendations, not dashboards:** clear next steps on what to make more of.

fastrr Ads

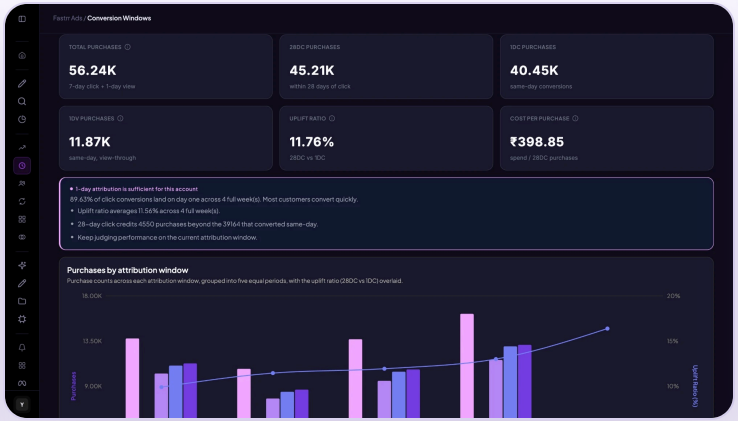

Go deeper than vanity metrics

- **Uncover audiences:** find new segments and untapped reach, not just ROAS.
- **Plain-English reads:** each view flags what it means and what to do next.

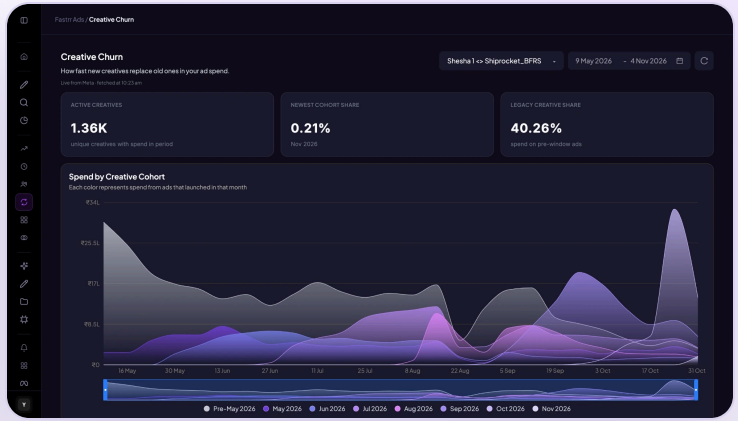

Net New Reach

How much of your reach is genuinely new people vs repeat exposure, with an audience saturation warning.

Conversion Windows

Which attribution window is enough for your account, based on how fast customers convert.

Creative Churn

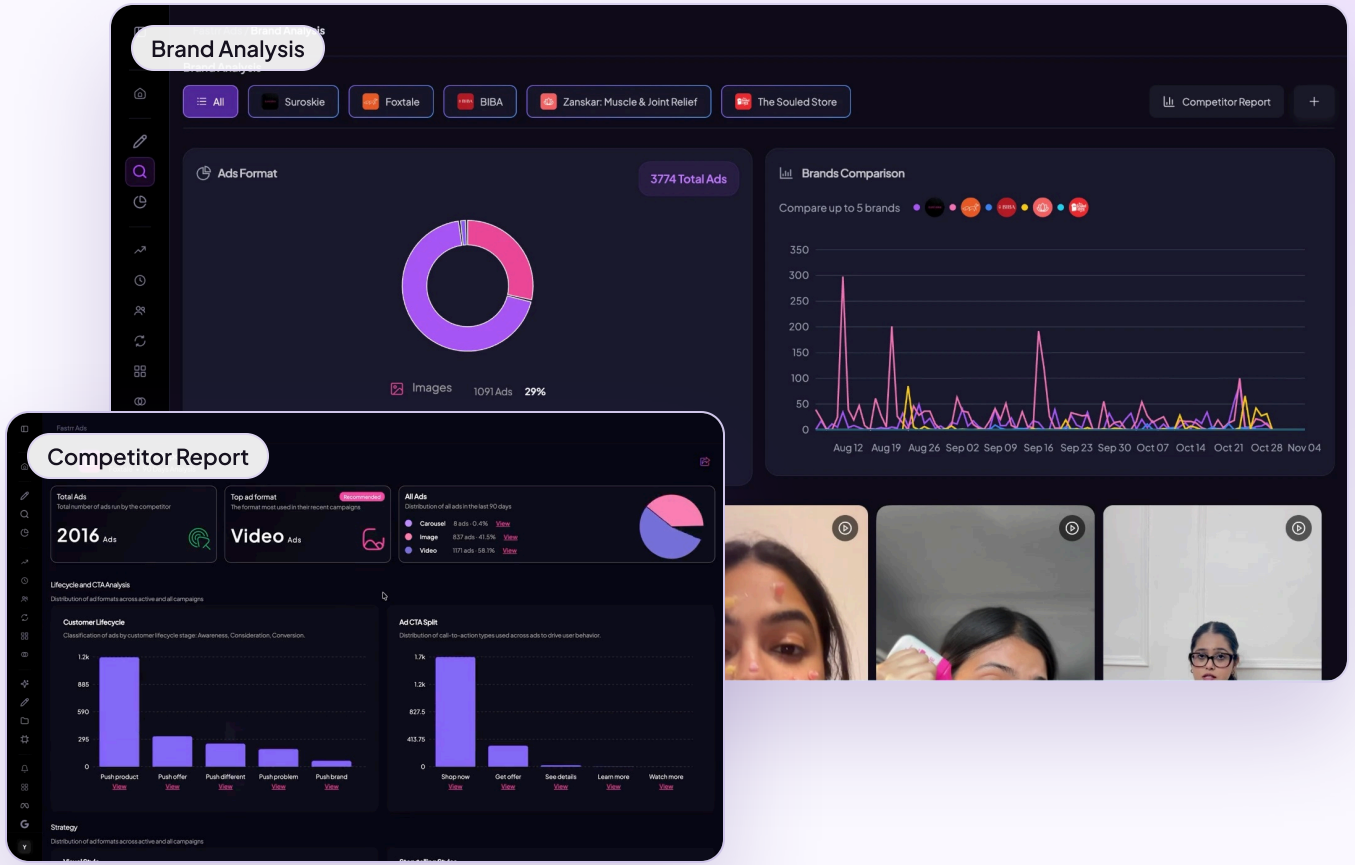

How fast new creatives replace old ones in your spend, by launch cohort.

fastrr Ads

04 · COMPETITION

See what competitors actually run

- **Brand Analysis:** add as many competitors as you like and see ads launched, format mix and launch timing.
- **Competitor Report:** a 90-day strategy view: visual style, storytelling, hooks, CTAs, top products, collections and landing pages.
- **Act on it:** save ads to a collection, or download them as MP4 or MP3.

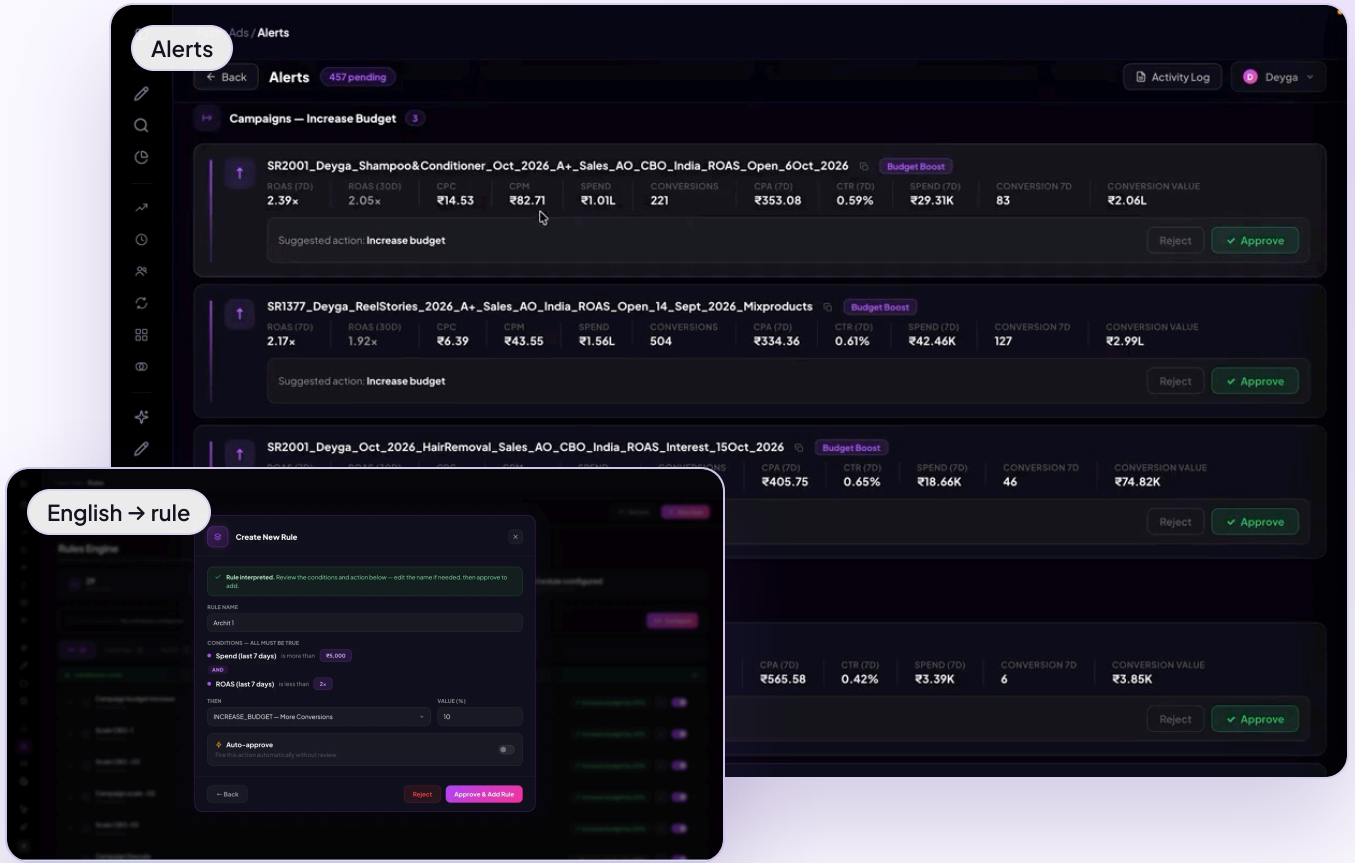

fastrr Ads

05 · AD SPEND

Rules and alerts that protect spend while you sleep

- **Smart defaults plus your own:** sample rules from our internal marketing team, or write one in plain English.
- **Every level:** scale or cut budgets at campaign, ad set and ad level, and pause losing ads.
- **You stay in control:** approve each action by email or in-app, or turn on auto-approve on a set frequency.

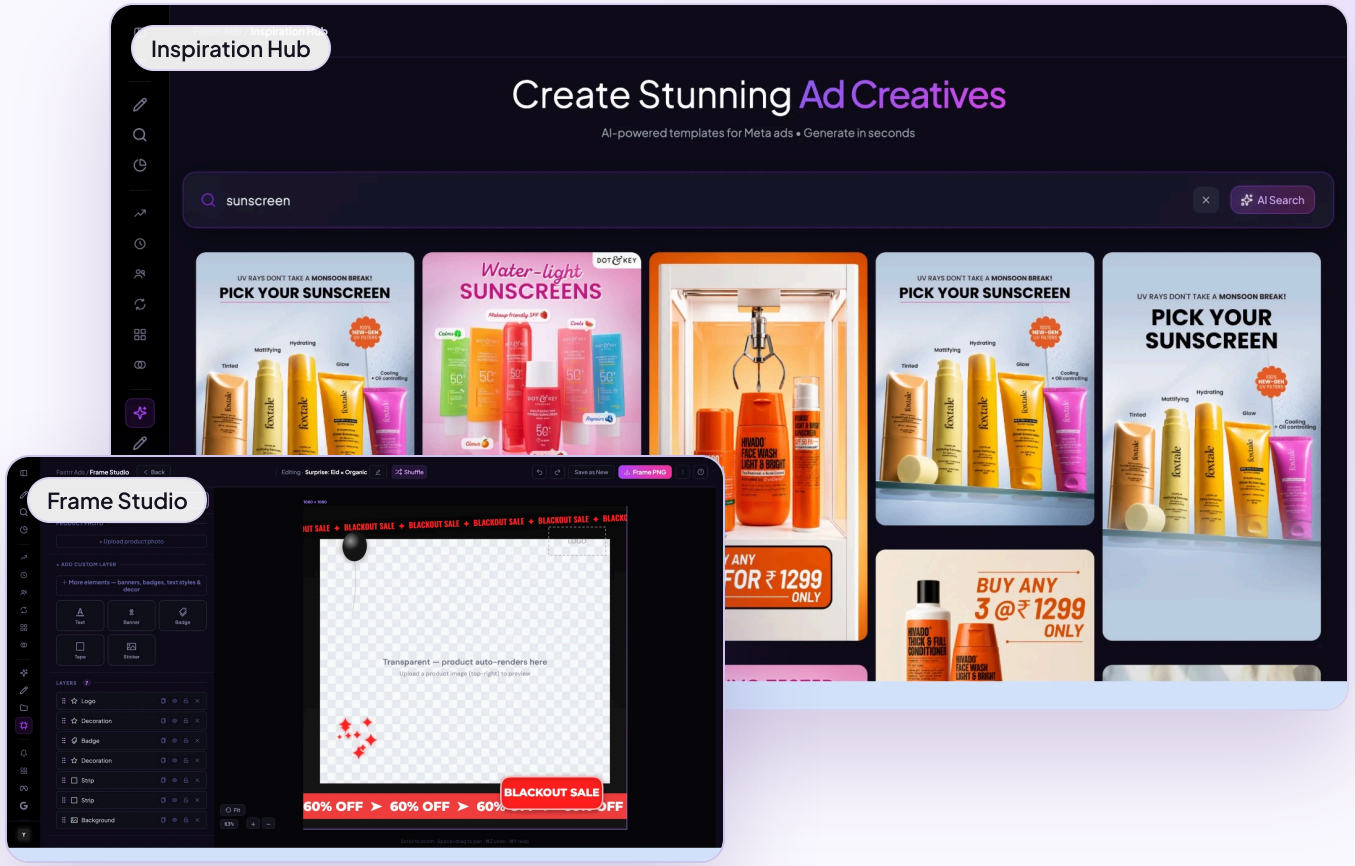

fastrr Ads

06 · CREATE

Inspiration to finished creative in seconds

- **Inspiration Hub:** a Pinterest for ads, with 3 lakh+ real ad inspirations to search.
- **Generate with AI:** pick the ads you like, upload your product photo, and get static creatives built for your SKU.
- **Frame Studio:** fine-tune layers, badges and banners, then export.

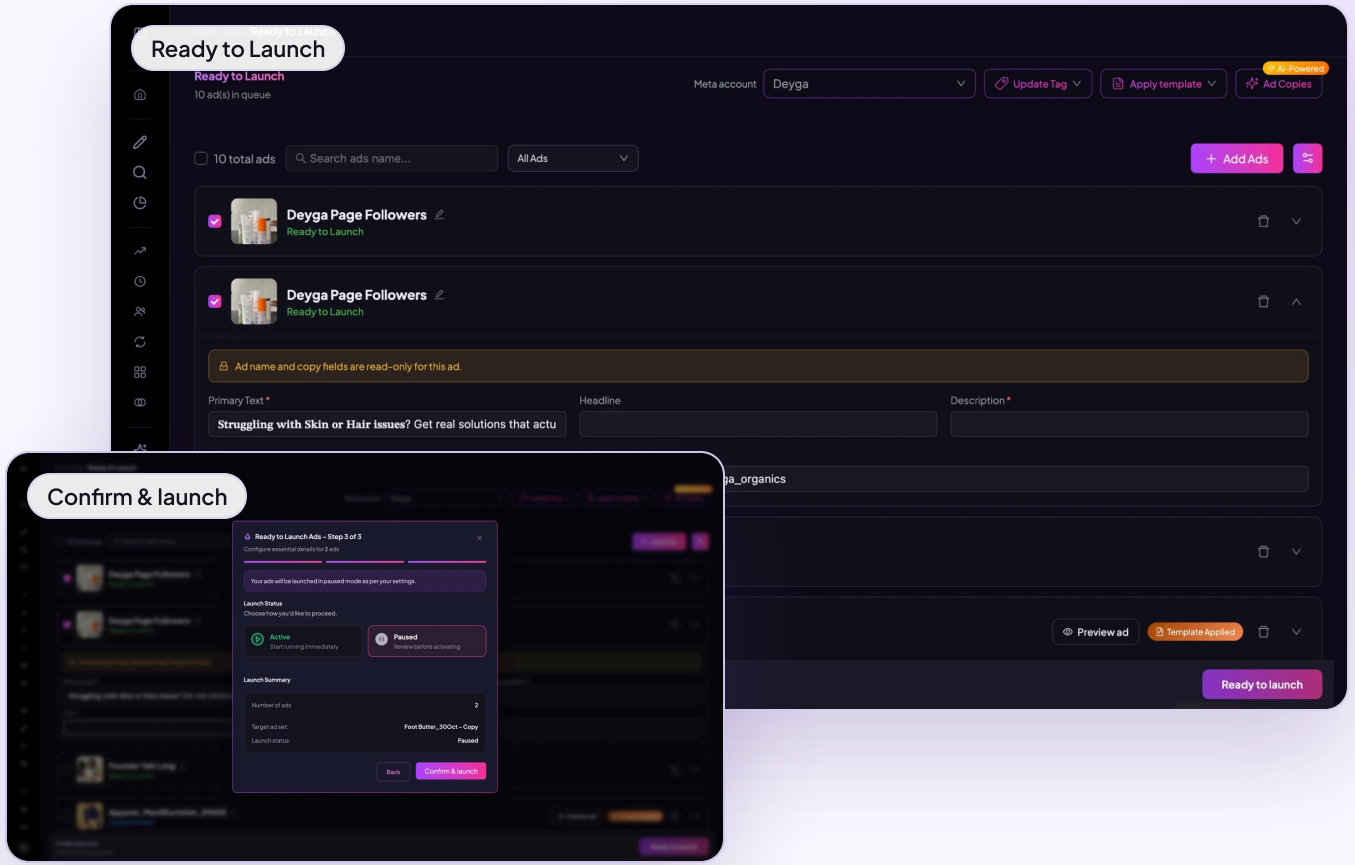

fastrr Ads

07 · LAUNCH

Launch from the same platform

- **Bring any creative:** upload an image or video, pick from your collection, or reuse an existing ad.
- **AI ad copy:** copy is generated by reading the video, so nobody writes it by hand. Apply a template, such as a sale template, in a click.
- **Straight to Meta:** launch many ads into an existing ad set, active or paused, without opening Ads Manager.

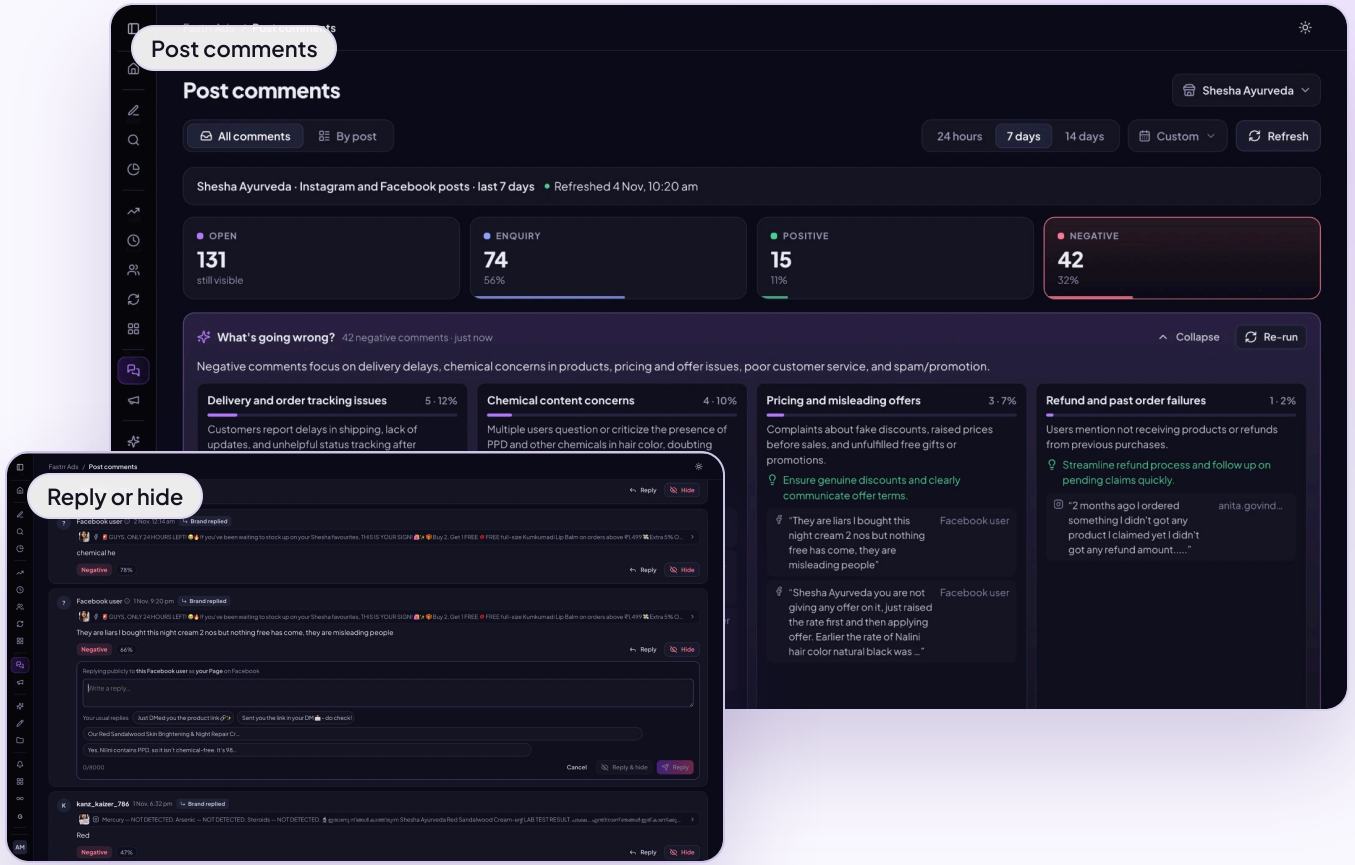

fastrr Ads

08 · COMMENTS PULSE

Turn ad comments into signal

- **Auto-sorted:** post and ad comments land in enquiries, positive and negative.
- **What's going wrong:** AI groups negative comments into themes, such as delivery delays or offer clarity, each with a suggested fix.
- **Act in one click:** reply with saved responses, or hide all negative comments.

WHY FASTRR ADS

One workspace, full loop, less friction

20 tabs become one

Research, creative, launch, optimisation and reporting sit together instead of across Ads Manager tabs.

Always-on optimisation

Rules and alerts scale winners and pause losers around the clock, while you approve or auto-approve.

Creative you can learn from

Every ad is tagged by hook, story and visual, so you see why creatives work and which to make next.

Know your competition

See rivals' creatives, offers, messaging and strategy next to your own results.

Create and launch in minutes

3 lakh+ inspirations, AI creatives, AI ad copy and bulk launch, without opening Ads Manager.

Built for Indian D2C

Shaped around realities like COD and RTO, so success is read on delivered outcomes, not just reported ones.

Less friction, more efficiency, better revenue.

COMING NEXT

Workspaces

Separate workspaces to organise brands, accounts and teams.

IN PIPELINE

Partnership ads

Run and manage partnership ads from the same platform.

IN PIPELINE

Catalog ads

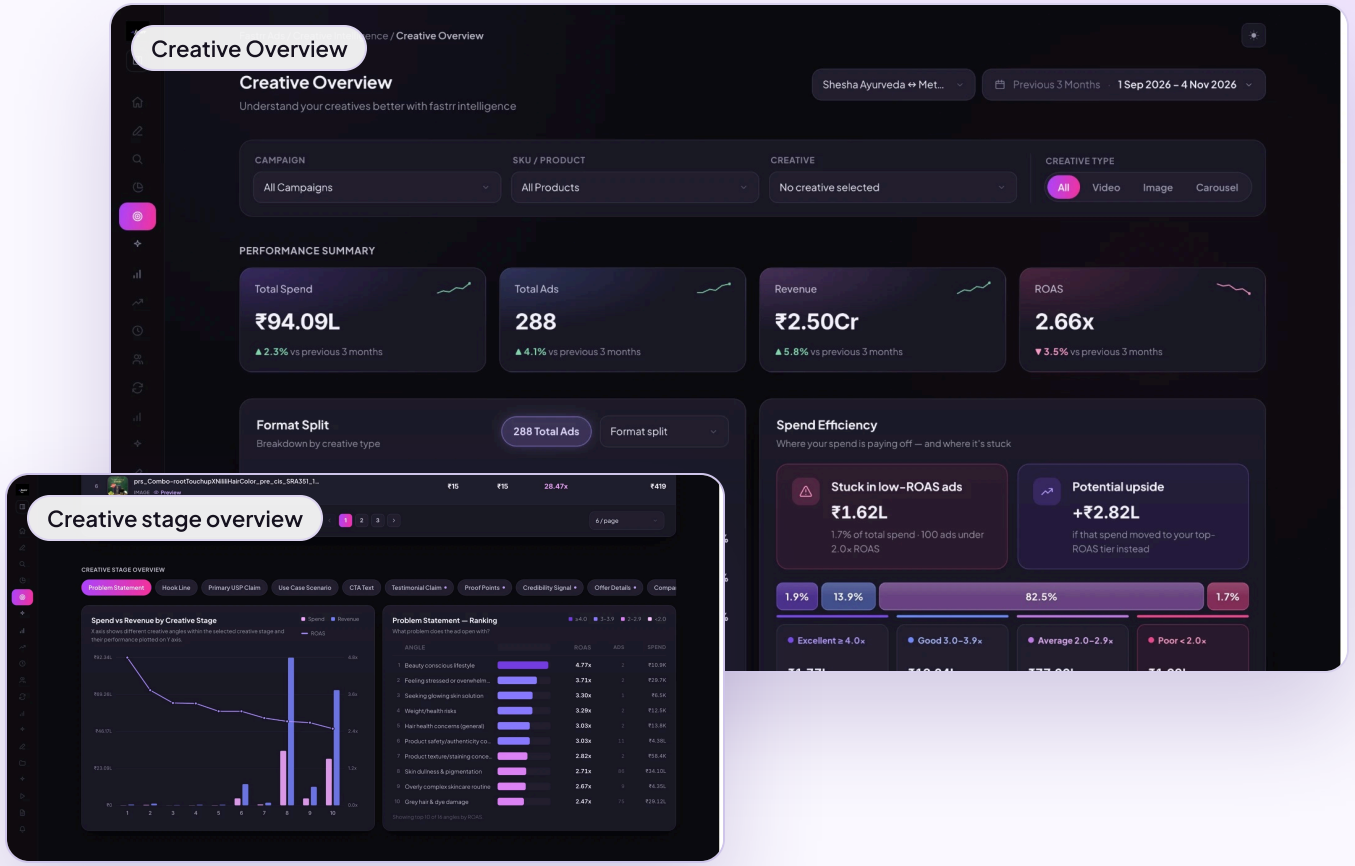

Create and manage catalog ads without leaving Fastrr Ads.

fastrr Ads

NEXT · CREATIVE OVERVIEW

See where spend pays off, and where it's stuck

- **Spend efficiency:** how much spend is stuck in low-ROAS ads, and the upside if it moved to your top-ROAS tier.
- **Creative stages:** every ad broken into problem statement, hook, USP claim, use case, CTA, proof points and offer.
- **Angle ranking:** see which angle in each stage earns the best ROAS, by campaign or SKU.

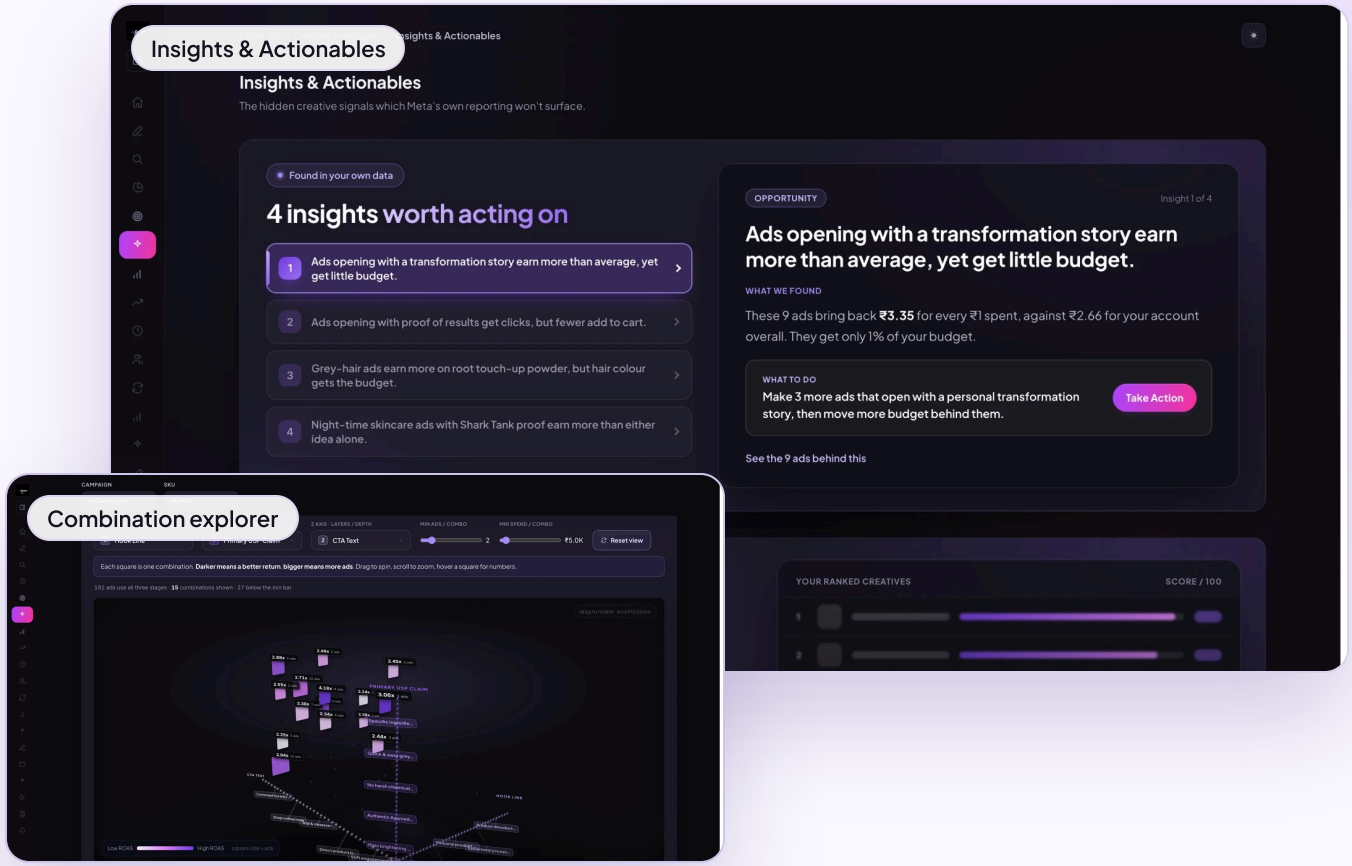

fastrr Ads

NEXT · INSIGHTS & ACTIONABLES

Hidden signals, with what to do about them

- **Found in your own data:** for example, ads that open with a transformation story earn more than average yet get little budget.
- **Clear next step:** each insight comes with what we found and a one-line action, with the ads behind it.
- **Combination explorer:** a 3D view of hook, claim and CTA combinations. Darker means a better return.

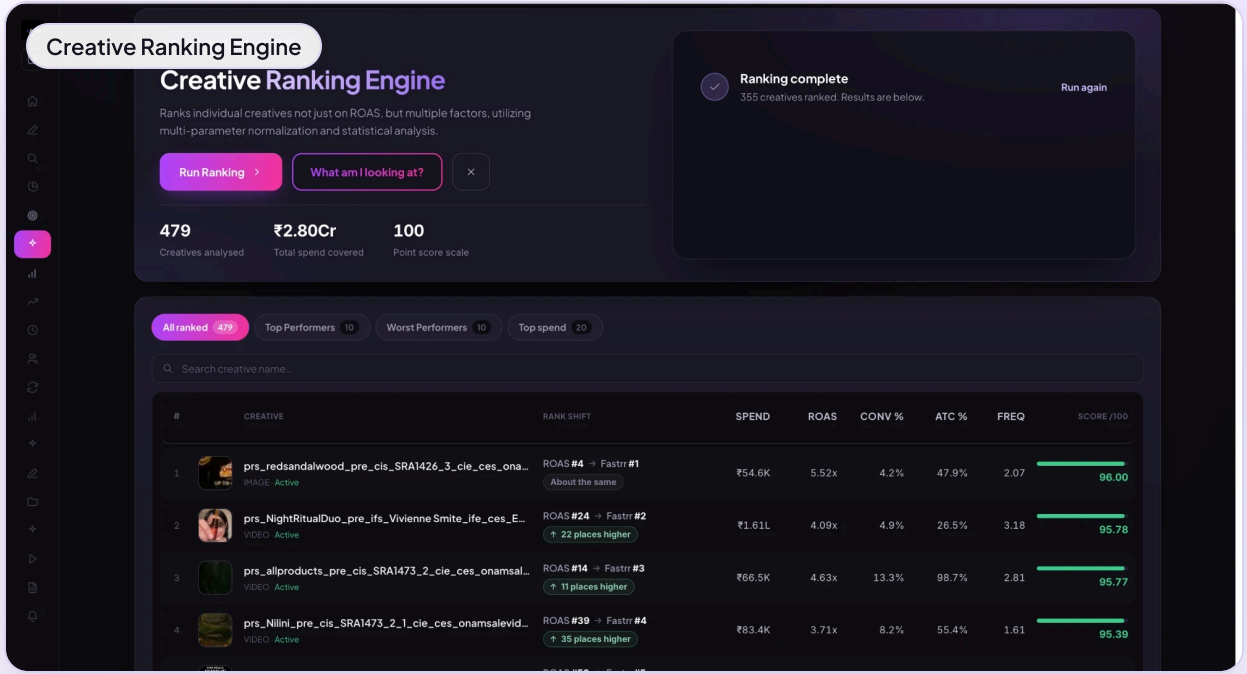

fastrr Ads

NEXT · CREATIVE RANKING ENGINE

Rank creatives on more than ROAS

- **Statistical, not just ROAS:** multi-parameter normalisation scores every creative out of 100.
- **Rank shift:** shows how far a creative moves up or down vs a plain ROAS ranking.
- **Quick views:** top performers, worst performers and top spend.

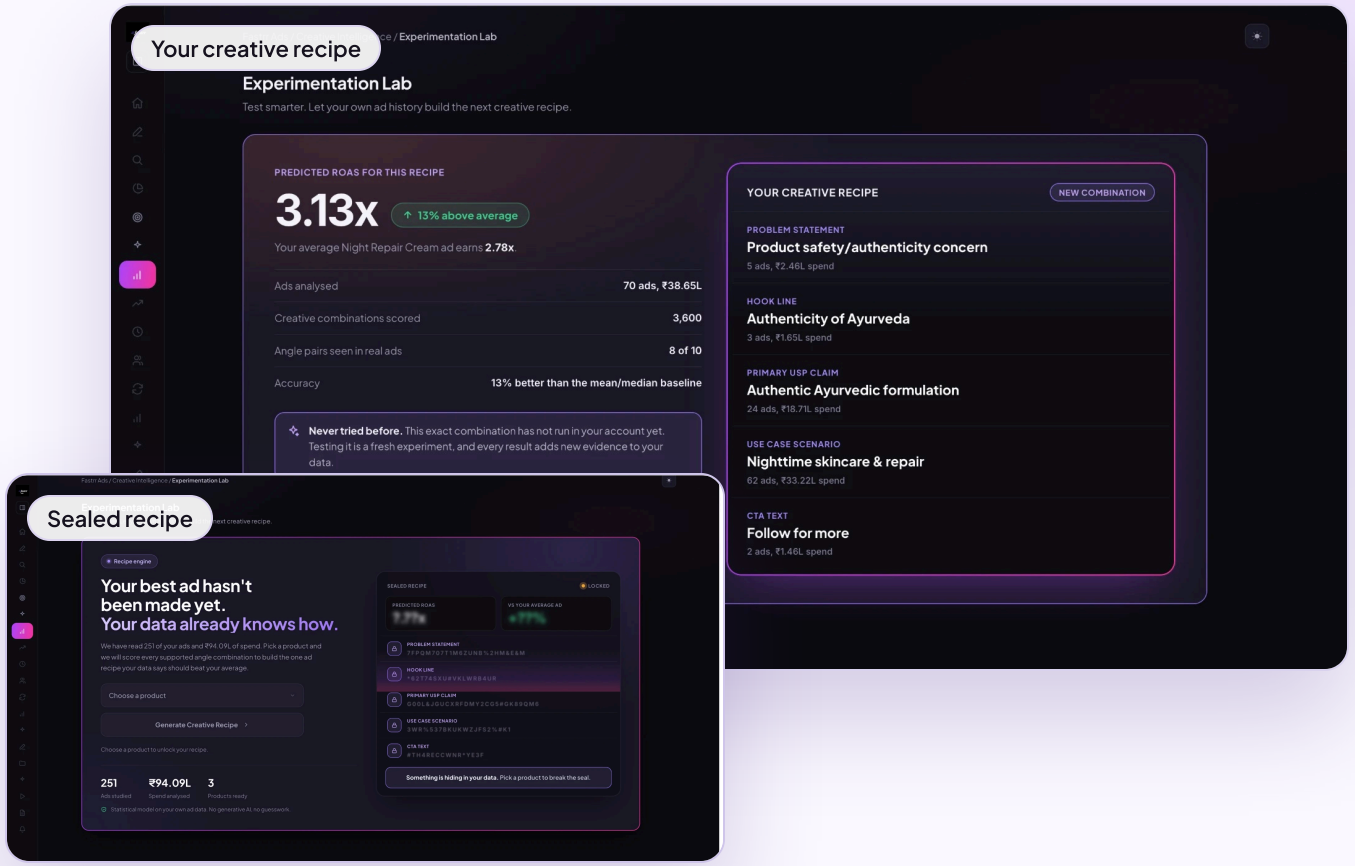

fastrr Ads

NEXT · EXPERIMENTATION LAB

Your best ad hasn't been made yet. Your data already knows how.

- **Recipe engine:** pick a product and it scores every supported combination of problem, hook, claim, use case and CTA.
- **Predicted ROAS:** shows the expected return of the winning recipe against your average ad, and flags combinations you've never tried.
- **From your data:** a statistical model on your own ads, not generative AI guesswork. Then generate the creative.
